PROJECTS

E-Commerce Website : (Deployed Link) (Github link)

- Engineered a comprehensive e-commerce website using HTML, CSS, JavaScript, React, and Node.js, offering a fully responsive and user-friendly interface.
- Developed key front-end features, including dynamic product listings, filtering options, and a search bar, to enhance user interaction and engagement.
- Built a robust back-end with Node.js, implementing functionalities for user authentication, product management, shopping cart operations, and secure payment processing.
- Demonstrated full-stack development capabilities by integrating front-end and back-end technologies, ensuring seamless communication between the user interface and server-side operations.

Youtube Clone : (Deployed Link) (Github link)

- Created a YouTube clone using HTML and CSS, replicating the platform's layout and design elements for a visually similar user experience.
- Implemented responsive design techniques to ensure the clone adapts seamlessly to various screen sizes and devices.
- Demonstrated strong proficiency in front-end development by accurately reproducing complex UI components and visual styles.

Currency Converter : (Github link)

- Developed a Currency Converter Website: Built using HTML, CSS, and JavaScript for the frontend, with MongoDB handling backend data storage and user authentication.
- Integrated Real-Time Currency Conversion: Implemented functionality to provide accurate and up-to-date exchange rates through an external API.
- Designed Secure Login and Responsive Interface: Created a secure login page and ensured the website is fully responsive across different devices for an optimal user experience.
